FREQUENTLY ASKED QUESTION

What is the difference between an open and closed meeting at the IW and IS?

INCOSE values transparency in all its actions and activities. An open meeting is one in which you can just drop in and start contributing to the work of the participants - in true workshop style. Closed meetings are those with a focused agenda and an audience qualified to address the agenda. In many cases, you can reach out to the chair of a meeting in advance - either to join the group or to observe. In some cases, it may be inappropriate; for example, the CAB is for Corporate members; the CAG is the advisory group for Certification discussing sensitive topics where the meeting must be closed to protect the integrity of the process and the certification.
